

Caterpillars & Butterflies: Major Concepts

Image:https://en.wikipedia.org/wiki/File:2012-06-27_Aporia_crataegi_eggs_Malus_domestica.JPG

Objectives

- Explore the lifecycle of a caterpillar
- Learn about the eggs, caterpillars, chrysalis, and butterflies
- Discover that butterfly pollinate flowers
- Pretend to be a butterfly and learn about the parts of a butterfly

Compare and Contrast:

- What kinds of food do we eat to help us grow? What foods does The Very Hungry Caterpillar eat to grow? What type of food does a real-life caterpillar eat?
- How do caterpillars move their bodies? How do butterflies move?
- How do caterpillars and butterflies differ in appearance?

Life Cycle

Materials:

- 2 empty paper towel rolls
- Empty water bottle
- Masking or painters tape
- Sticks from outside
- 2 sheets of paper
- Crayons or markers
- Scissors
- Cup/glass/mug to for tracing
- Cotton ball

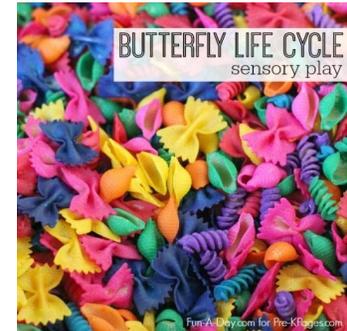

Inspired by:

<https://www.pre-kpages.com/butterfly-life-cycle-sensory-bin/>

Materials:

- **Eggs** - dry beans, lentils, or cotton balls
- **Caterpillar** – rotini pasta
- **Chrysalis** – shell pasta
- **Butterfly** – bowtie pasta

Egg: A cotton ball makes a perfect egg

Caterpillar: Trace the outside of a cup onto a piece of paper to make a circle. Repeat 6-8 times until you have enough circles for an entire caterpillar. Cut and decorate the circles. Tape the circles together, overlapping slightly, so they form a line. Cut thin strips of paper to make antenna and legs and tape to the head and body. Tape the finished caterpillar on a towel roll

Chrysalis: Wrap an empty water bottle with masking tape. Tape the water bottle to a stick or small branch

Butterfly: Draw the outline of a butterfly on a piece of paper. Add color to the wings using crayons or markers. Cut out the butterfly and tape it to the other empty paper towel roll.

Dye the Pasta (optional):

- Place pasta in a plastic bag
- Add a few drops of food coloring and shake
- Put the dyed pasta on a paper towel to dry
- Use different colors for each type of pasta

Discussion:

- Ask your child to scoop out an example of an egg, a caterpillar, a chrysalis, and a butterfly
- Have your child group like items together and talk about which life stage each pile represents
- Ask your child to describe how each item looks and feels. If you dyed the pasta, have your child tell you the color and talk about if it is dark or light
- Count the number of items in each pile and the number of piles

The Very Hungry Caterpillar

Scavenger Hunt

Read *The Very Hungry Caterpillar* by Eric Carle and see if you can find all the foods that are named in the book in your kitchen or home. Play, pretend, or pictures of food counts

Caterpillar Food Trail

Cut out, print, or draw pictures of various foods. Tape these to a tabletop, fridge, or window, designing a food trail for your new caterpillar to eat through.

Color Sorting Caterpillar

Create the body of the caterpillar with different colored circles and sort various objects (buttons, bottle caps, paper scraps) that match those colors.
